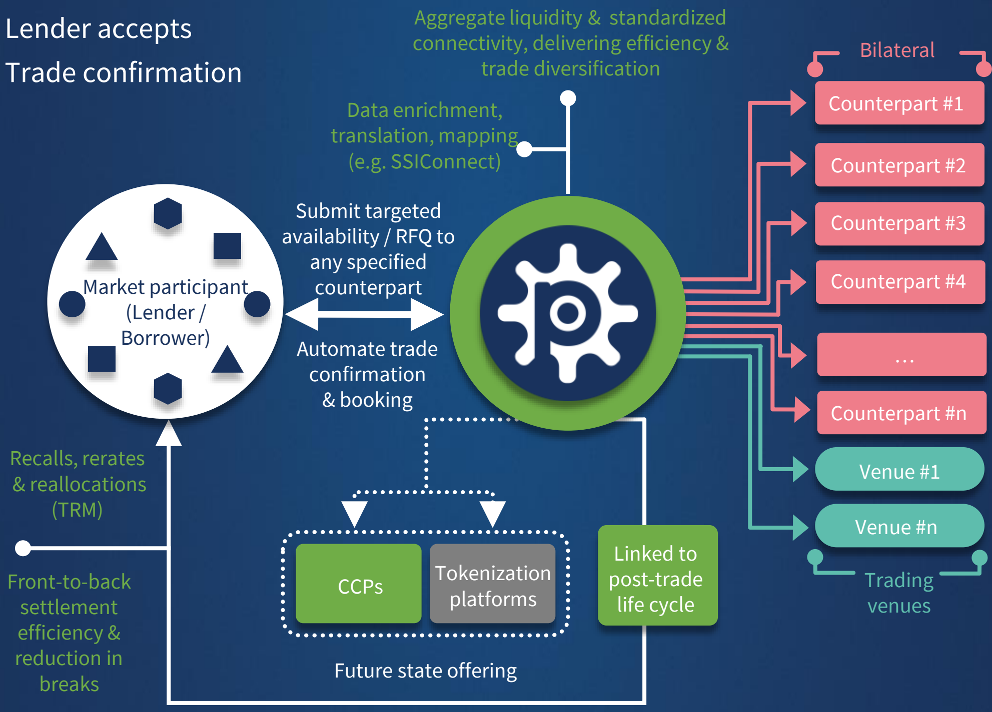
Introducing Pirum TradeConnect

Pirum TradeConnect extends our existing Securities Finance platform, by automating pre-trade and trading flows via standardized, secure, and resilient routing of trading flows between counterparties and trading venues.

5 core API flows covered:

- IOI/ RFQ
- General and targeted availability
- Borrower bids
- Lender accepts
- Trade confirmation



✓ Connect in real-time to venues and bilateral counterparts	✓ Seamless integration with post trade	✓ A scalable, resilient and standardized platform

Pirum TradeConnect Key Benefits

One connection
Single seamless connection to any counterpart or venue, delivering minimal maintenance & operational costs

Adaptable
Retain existing data formats & ways of working, keeping build costs to a minimum

Futureproofed
Market-leading SMEs ensuring clients are prepared for cutting-edge developments, including CCPs, tokenization, T+0 settlement

Scalable
Cost benefit & economy of scale as your business grows, minimal incremental resource constraints for new connections

Secure & resilient
AWS cloud solution with best-practice design standards for fault-tolerance & durability; fast & clean re-build capability

'Get it right, Pre-Trade'
Standardized pre-trade, pre-settlement & post-trade processes (e.g. SSIs), offering front-to-back settlement efficiency

What's Next for Pirum TradeConnect

- Increased Liquidity
- Data MIS
- SSIConnect & ETL Mapping Layers
- Consolidated full lifecycle data & AI Assistants
