

IM Instruct

IM Instruct from Pirum Systems saves time, reduces risk, and increases capacity with your collateral team by automating, optimising and harmonising the instruction and management of Initial Margin (IM) with Triparty agents

Service overview

With IM Instruct you can achieve a single exception-based process to instruct and manage IM across all triparty collateral venues. Single, standardised procedures mitigate operational, counterparty and liquidity risk and limit the resource impact of the volume explosion expected from phase V & VI of UMR.

- IM Instruct goes way beyond simply sending a SWIFT and delivers true exception-based processing with a single operating model
- Manage every venue, every counterparty in one screen
- Delivers 360° process coverage whether you're pledgor or pledgee of collateral with full exception handling
- Real time monitoring of all venues and collateral coverage, alerts of allegements, reporting of collateral coverage
- Dedicated Pirum support team backed by SLA

Key Benefits

- Single connection to all triparty agents globally
- Removes manual operational processes
- Real-time view of all settled and pending positions
- Real-time view of all allegements
- Works seamlessly with Pirum's collateral optimization solution (CollateralConnect)
