

# RepoConnect

Pirum's RepoConnect service provides a near real time, event based, open trade matching and exception management tool for your entire Repo trade population

## Service overview

Pirum automates key operational processes across the Repo lifecycle, giving both buyer and seller the tools to compare and affirm the key economics of transactions on trade date.

- Manually intensive operations processes can be replaced with a scalable, automated, standardised solution across your Repo portfolio
- RepoConnect improves post trade workflows globally with more STP, greater transparency and more stringent controls preventing missed lifecycle events and reducing trade fails
- Connectivity with counterparts enables resolution of breaks to ensure accurate trade capture and timely settlement

## Key Benefits

- Compare & Affirm in near real-time key trade economics with 100% of your counterparties
- Reconcile, identify, and resolve breaks without leaving the platform
- Reduce fail costs and ensure CSDR compliance via accurate trade matching
- Ensure accuracy of Risk, Positions and desk P&L
- Gain insights into trends and matching efficiency via powerful MIS tools
